

## **Anders Lundblad, CTO of myFC, has been Invited to Speak at the 1<sup>st</sup> NEST 2007 International Workshop**

Anders Lundblad will be sharing his expertise on “myFC FuelCellSticker™ – A revolutionary solution for micro fuel cell systems”. “NEST 2007” will be held from 9-10<sup>th</sup> October in Tours, France.

The myFC FuelCellSticker™ is designed to optimize power density –leading to high efficiency. This means that it can meet the growing power and volume demands of portable electronics. The FuelCellSticker™ is low in cost, being simple to produce and having an efficient production method. Its small and flexible design enhances its seamless integration into portable electronics.

Anders Lundblad will be discussing both experimental data and new product concepts at his presentation tomorrow.

The 1<sup>st</sup> International Workshop “NEST 2007” targets innovative promising solutions arising in the market today, focusing on the technology developments of these new energy solutions. It promotes an international lineup of speakers from prominent companies; Nokia and BIC are amongst the companies attending. It is organized by the S2E2 (Electrical Energy Sciences and Systems) Cluster.
